

WEB DEVELOPMENT CERTIFICATE +

Web presence today means more than simply putting a navigable site out on the web. Developers must plan strategically, creating dynamic, engaging, user-friendly sites while organizing and generating content to maximize impact. The web development certificate enables students to develop the technical competencies that are required to plan, develop, and implement websites that are both appealing and useful combined with the skills necessary to market ideas online.

Required Courses are listed in the order in which we recommend you take them.

- First Semester Seminar
INT 1050 - Dimensions of Self & Society
- COM 1180 - Storytelling through Media
- CIS 1045 - Introduction to Multimedia Applications & Tools
